

Prior executive reception

The first image of a company arises from the furnishing of its reception area.

Prior is designed to compose reception counters of great prestige and functionality. Lacquered surfaces combined with wooden tops and attention to details give the range the greatest elegance.

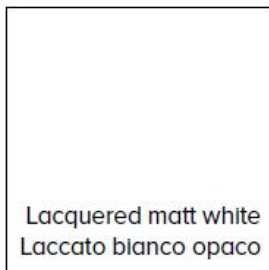

The reception top is a curved wood panel covered with soft eco-leather. The passage of the wiring has been hidden inside the structure, invisible but easy to manage. Optional LED lighting strips to be inserted in the lower part of the counter.

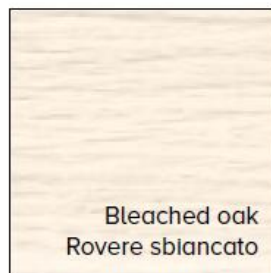

Il pianetto accoglienza è realizzato in legno curvo rivestito in morbida ecopelle. La canalizzazione elettrica è stata studiata e nascosta all'interno della struttura portante, ma è anche facilmente ispezionabile. Sono opzionali eventuali strisce illuminanti a led da inserire nella parte inferiore del bancone.
