dyson cinetic big ball animal

Dyson Cinetic Big Ball Animal vacuum cleaner

No filters to wash. No bags to buy.

Dyson Cinetic technology separates microscopic dust that potentially clogs other vacuums. Self-rights when toppled. With a self-adjusting cleaner head for all floor types. Engineered for homes with pets.

Carbon fiber turbine tool.

Carbon fiber filaments pick up fine dust from hard floors, while stiff nylon bristles help remove ground-in dirt from deep within carpets.

Animal vacuum cleaner tangle-free turbine tool. Designed for homes with pets.

Counter-rotating brush heads remove hair from carpets and upholstery, with no brush bar for it to wrap around. Engineered for homes with pets.

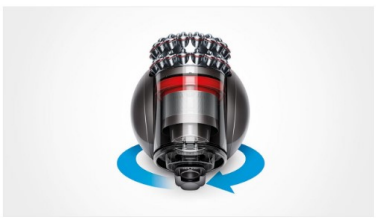
All features

Dyson Cinetic™ science
Ultra-efficient cyclones capture dust without clogging, so there's no loss of suction.

Filter free
The only vacuum with no filter maintenance, so it never loses suction.

Picks itself up, as well as the dirt.
With the center of gravity inside the ball, it's easy to maneuver around your home without snagging. And i falls over, it picks itself up again.

No need to touch the dirt.
Drives out dust and debris in one action, so you don't have to touch it.



Ball™ technology for easy steering
The Dyson Cinetic Big Ball Animal vacuum cleaner rides on a ball, to steer easily around corners and into difficult places.

Large bin
So you can clean for longer without having to stop.

Quick-release tools
One-click attachments make it easy to change tools between tasks.

Long-reach wand
The wand releases instantly and stretches to 50 inches, to access high places.
