Mattress with lumbar reinforcement - total independence

The purpose of the lumbar support of a mattress is to keep the spine in a neutral alignment while sleeping. A mattress that is too soft will cause the spine to tilt unnaturally.

A firm mattress with lumbar support helps relieve pain by distributing body weight more evenly and supporting spinal alignment. This, in turn, can help improve sleep quality.

High quality materials.

Natural fibers, original luxury breathable fabrics and anti-dust mite treatment, natural fiber filled mattress pads, pocket springs with foam wall, lumbar reinforcement, 4 luxury embroidered handles, exclusive quilting.

This mattress is recommended for anyone who cares about their health and their back. Prevention is very important and using a mattress with lumbar support will help avoid and prevent back pain.

Pocket springs are the foundation of high quality mattresses and are a critical component that any mattress buyer should be thoroughly familiar with. A pocket spring is an individual spring that is wrapped in a fabric sack. These individual springs are sewn together to create a length of individual pocket springs that are connected. This allows you to rest independently supported on each pocket spring stopping lateral movement and not feel the movements of the partner. The pocket springs are breathable and do not allow heat to build up.

The mattress has four exclusive embroidered handles to make it easy to turn the mattress over. The mattress is identified with your name embroidered on it.

Designed to improve the quality of rest. Comfort, adaptability and a feeling of well-being.

Our factories

Our factories cover an area of 60,000 m2 in Alginet, Valencia and thus Dupen becomes a powerful mattress manufacturer in Europe.

Our commitment to the environment.

100% renewable energy

The 100% sustainability objective has been with us for many years. Our commitment to the environment translates to leaving a better world for future generations. All of our production buildings covering 60,000 m2 have solar panels on their roofs producing energy for all our factories. We take advantage of the sun, a great source of renewable energy in our geographical area. Our second source is the incorporation of natural and ecological materials to our mattress production. With these actions we help the conservation of the planet, produce higher quality mattresses and contribute to better health of our customers.

Since 1966 making dreams come true

For longer than 50 years, Dupen is continuing intensive researches in order to improve the way we sleep. We strive to offer the best services, latest technology and innovative designs for our clients. Offering the joy of living in welcoming spaces and using the latest trends that can help improve the way we sleep. Our team of 180 people work every day for continuous improvement guided by strong values: sustainability, teamwork and respect for the environment. We present a new catalogue full of novelties and new sensations, with new mattress collections for all the environments and based on the innovation of the design, creativity and quality of the product. Mattresses are the heart and soul of our company. Every detail in the manufacturing process has the solely purpose of providing ultimate comfort and to guarantee our clients, the best quality to meet the highest standards, technology, development, innovation and comfort in all our mattress to provide the best sleeping experience. We hope you enjoy our new catalogue and thank you for supporting our company.

We are DUPEN, we provide quality and commitment during your sleep

We are in constant evolution. Our team of experts is dedicated to provide the latest in technology and perfecting the quality of our products. Over 50 years, offering the best quality has been a fundamental pillar in all our departments: from design to production and clients service. Thanks to our clients support and trust, Dupen today produces over 1,000 mattress a day, while always maintaining its quality standards to meet its international markets demand. Rest and sleep are essential for a healthy and active society. We continuously aim to provide, through our wide range of high-quality mattresses, relaxing nights and the best sleeping experience. Our course is guided by three simple words: Innovation, design and quality.

Dupen is fully involved with its clients, distributors and final consumers to offer best possible quality and service for all our products. Buying Dupen is a full guarantee of being backed by a leading manufacturer and its whole team who ensure and make possible the continuous quality offered, the product innovation and the assurance that only an international market leader exporting to over 55 countries can offer.

Quality is an essential reference point. Product quality is the best we can offer our clients.

We are proud to extend our period of product warranties well above the periods marked by law and other manufacturers.
